Innovating Postpartum Mental Health

A Digital Solution for Socially Isolated Mothers

GROUP 21

**Happy
Pregnancy**
Mental Health App

Maternal Mental Health: A Critical and Underserved Issue

- Over 35% of Londoners report frequent loneliness, making new mothers especially vulnerable
- Up to 80% of mothers experience “baby blues”, while over 1 in 10 suffer from Postpartum Depression (PPD)
- PPD is linked to emotional withdrawal, impaired bonding, and poor developmental outcomes in children
- Social isolation, sleep deprivation, and hormonal shifts are key contributing factors
- £1.2 billion estimated annual cost of perinatal mental health issues to the NHS and social services
- Current NHS services are overstretched and struggle to offer timely mental health care

Bridging the Gap: A Clinically Informed, Connected Solution

[Intro](#)[About Us](#)[Service](#)[Contact](#)

A digital platform that supports mothers at risk of PPD through:

CBT-informed tools for self-guided therapy

AI-powered Symptom tracking and check-ins

Community meetups co-organized with hospitals and libraries

24/7 access to clinical advice via chatbot and virtual support

- Free subscriptions are provided through the NHS for high-risk patients
- Benefits all stakeholders:
 - a. Mothers gain personalised support
 - b. Healthcare providers can intervene earlier
 - c. Policymakers get scalable, data-driven insights

Technical Feasibility

Gaps in Current Tools

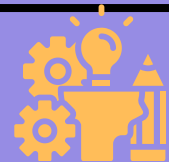

- Limited Integration with NHS Systems, reducing clinical values
- Insufficient cultural inclusivity and peer support
- Minimal personalization and long-term engagement

Our Solution

- AI-enabled chatbot with integrated mood tracking
- Multilingual, culturally relevant design
- Peer and community support features
- Security data sharing compliant with NHS Standards

Development Path

- Research and stakeholder mapping
- Prototype development
- Pilot testing with postpartum users
- NHS alignment and scaling

Key Challenges & Mitigation

- **Data Security:** End-to-end encryption, NHS compliance
- **AI Safety:** Emotional support focus with escalation protocols
- **User Retention:** Flexible check-ins, engagement reminders
- **Inclusivity:** Co-design with diverse communities

Market overview

Rising Demand in Maternal Mental Health

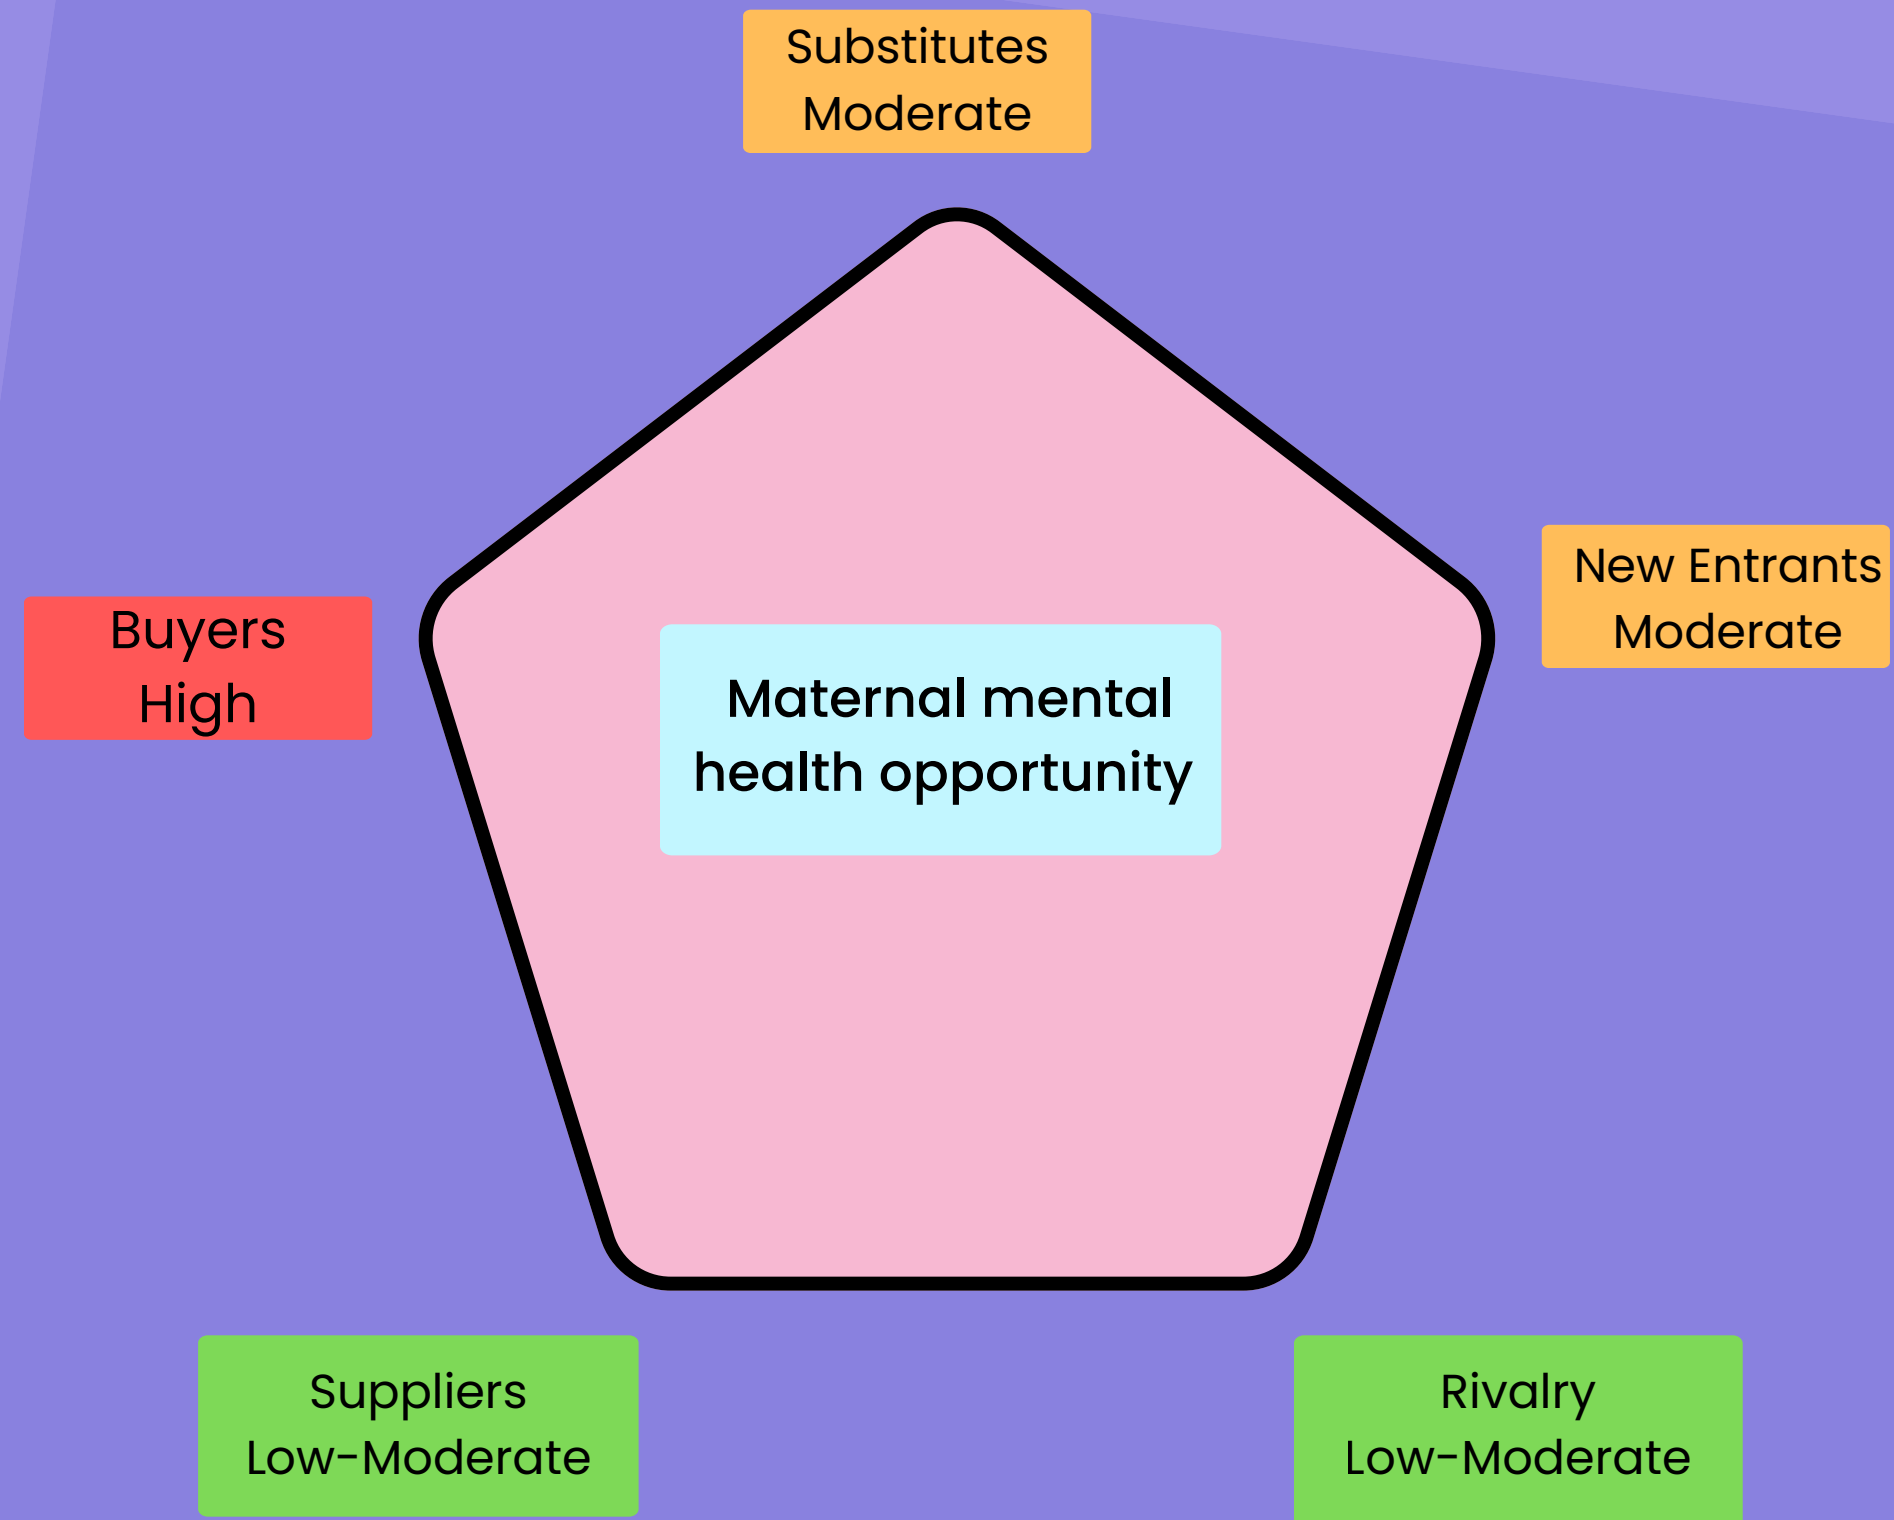

Prevalence: 10–15% of mothers experience PPD in first year (≈13k–16k annually in London).

Drivers: COVID-19, social isolation, economic stress → higher demand.

Global Trend: Femtech market to grow from **\$50B (2024) → \$100B+ (2030), 16% CAGR.**

Service Gaps:

- 40% of women lack timely support (MMHA, 2022).
- Long NHS wait times, stigma, limited cultural inclusivity.
- Workforce shortages → unmet demand.

Porter's Five Forces– Maternal Mental Health (UK)

Competitiveness

Filling the gap in Maternal Mental Health

Current competitors

Peanut/Mush: strong community, no clinical support.

Headspace/Calm: mental health, not maternal-focused.

BabyBuddy: NHS-aligned, lacks interactivity/therapy.

White Space

No dominant clinically integrated, culturally inclusive maternal mental health app.

Our Differentiators (USPs)

- Clinical + Community model (CBT + peer support)
- NHS integration readiness
- Cultural inclusivity (multilingual, migrant-friendly)
- AI mood tracking & crisis escalation
- Holistic wellness modules

Projected Market Share

10k–20k users in Greater London
(Year 3, ~5%)

Regulatory Considerations

Compliance as Market Enabler

Data Privacy & Security

- UK GDPR & Data Protection Act 2018
- Informed consent, data minimisation, encryption
- Designated Data Protection Officer (DPO)

NHS Digital Readiness (DTAC)

- DCB0129 / DCB0160 safety standards
- Accessibility: WCAG 2.1 AA

Medical Device Regulation

- Current version: not regulated
- Future: UKCA certification

Strategic Legal & Policy Alignment

Supported by key laws:

- Health and Social Care Act 2012
- Children and Families Act 2014
- Equality Act 2010

Policy fit:

- NHS Long Term Plan 2019
- Women's Health Strategy 2022
- London Digital Health Strategy 2023

Growth pathways:

- Innovation funds: SBRI, NIHR...
- Public procurement routes : UK Public Contracts Regulations 2015
- Local authority & NGO partnerships

IP Strategy for Protection & Growth

IP assets:

- trademark, copyright, AI trade secrets, potential patents

Strategy:

- license to NHS/local councils, open-source non-core tools

Risk control:

- IP audits, clear contracts in partnerships

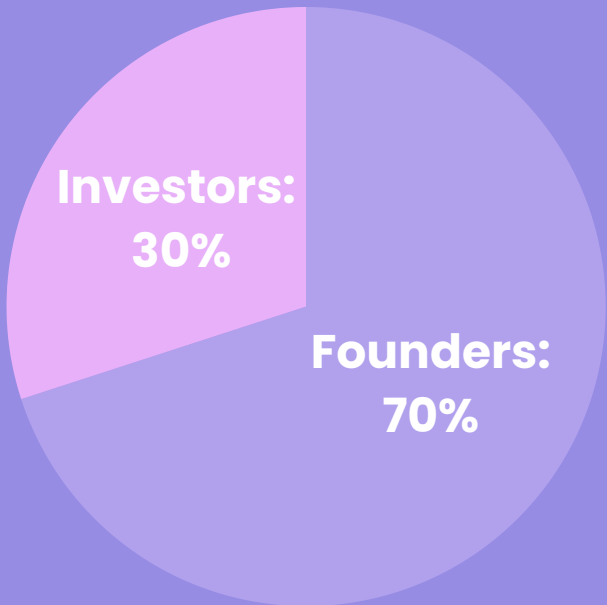

Financial Model

Financing Structure

Year	Source	Amount	Equity Dilution
Y1	NHS Innovation Grant	£150K	0%
Y1	Angel Investors	£200K	20%
Y1	Digital Health Accelerator	£50K	0%
Y2	Strategic Investors	£250K	10%
	Total	£650K	30%

- Founders retain 70% ownership after two rounds
- Funding used for product R&D, team expansion, and early market launch.

Post-funding Equity Structure

Revenue Model

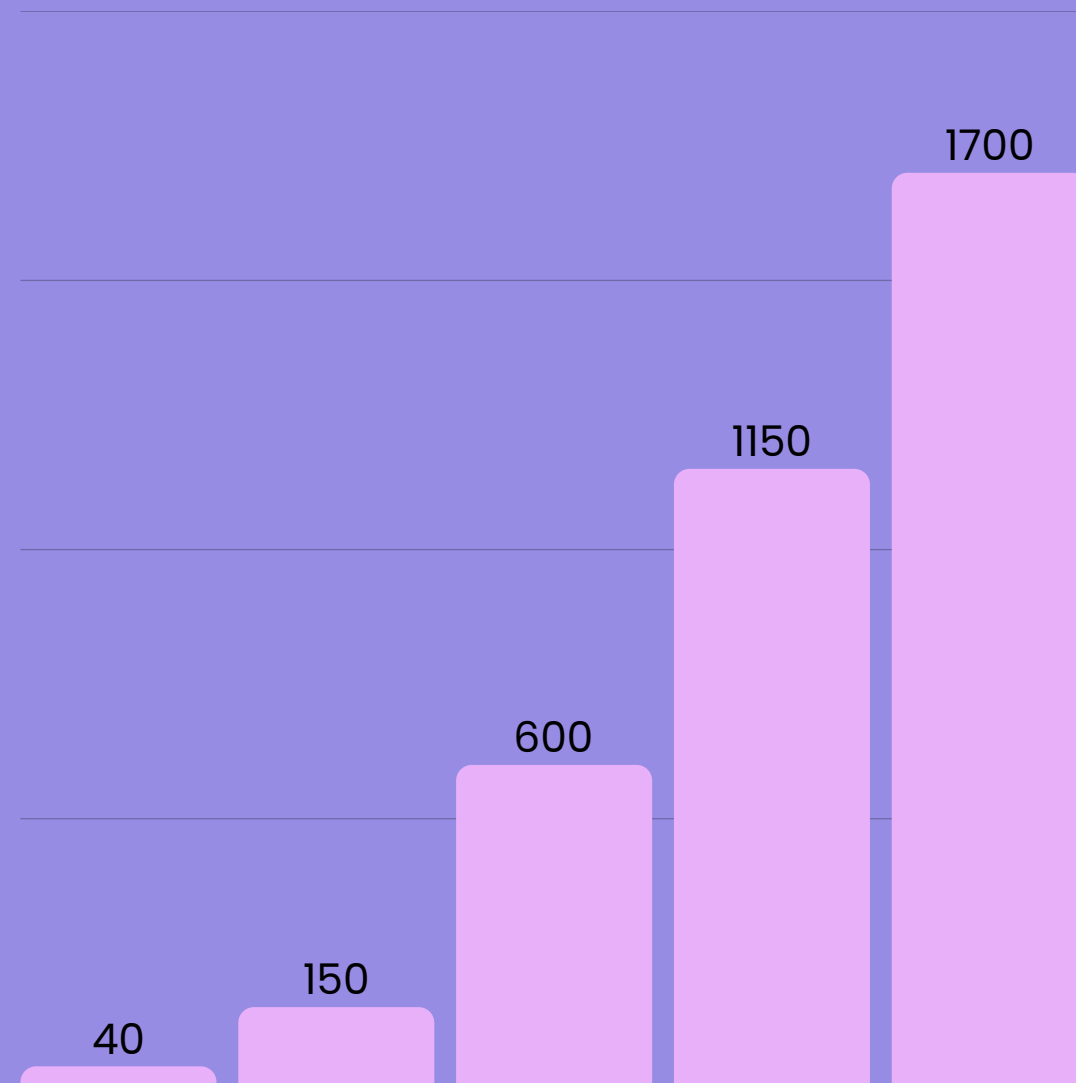

- B2C: £50/year per user for AI-based postnatal care & support
- B2B (NHS): £10K/year per NHS partner for service license
- 60% annual user retention
- 10% referral conversion rate

Financial Model

Revenue Growth

- From £40K in Y1 to £1.7 million in Y5
- CAGR: ~156.3%

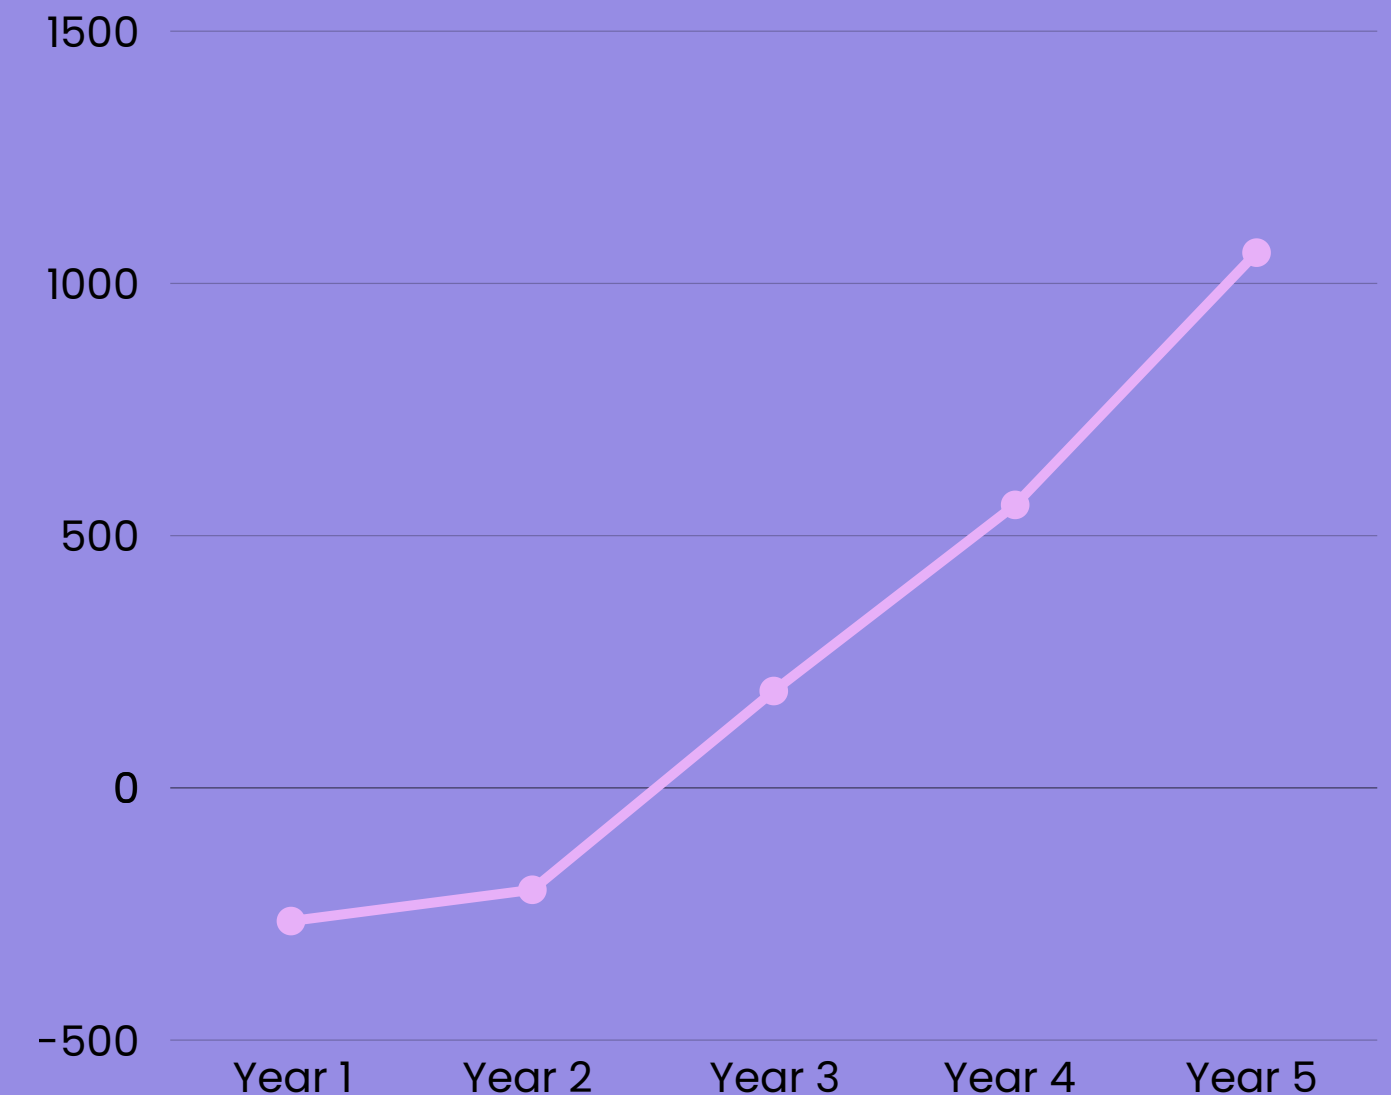

5-Year Revenue Forecast (Figures in £K)

Profitability Milestone

- EBITDA turns positive in Y3
- Net Profit in Y5: £1.06M

5-Year Net Profit Forecast (Figures in £K)

Market Channel

Main Channel

- Partnering with the NHS
- Offline community events

Money and Strategy

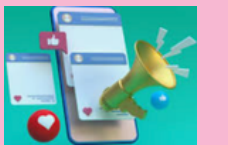

- Invest more to meet stricter NHS requirements for collaboration
- Fund real world studies (NICE Tier B)
- Allocate budget for NHS partnership
- Spend on organizing offline events

If failed

Backup Channel

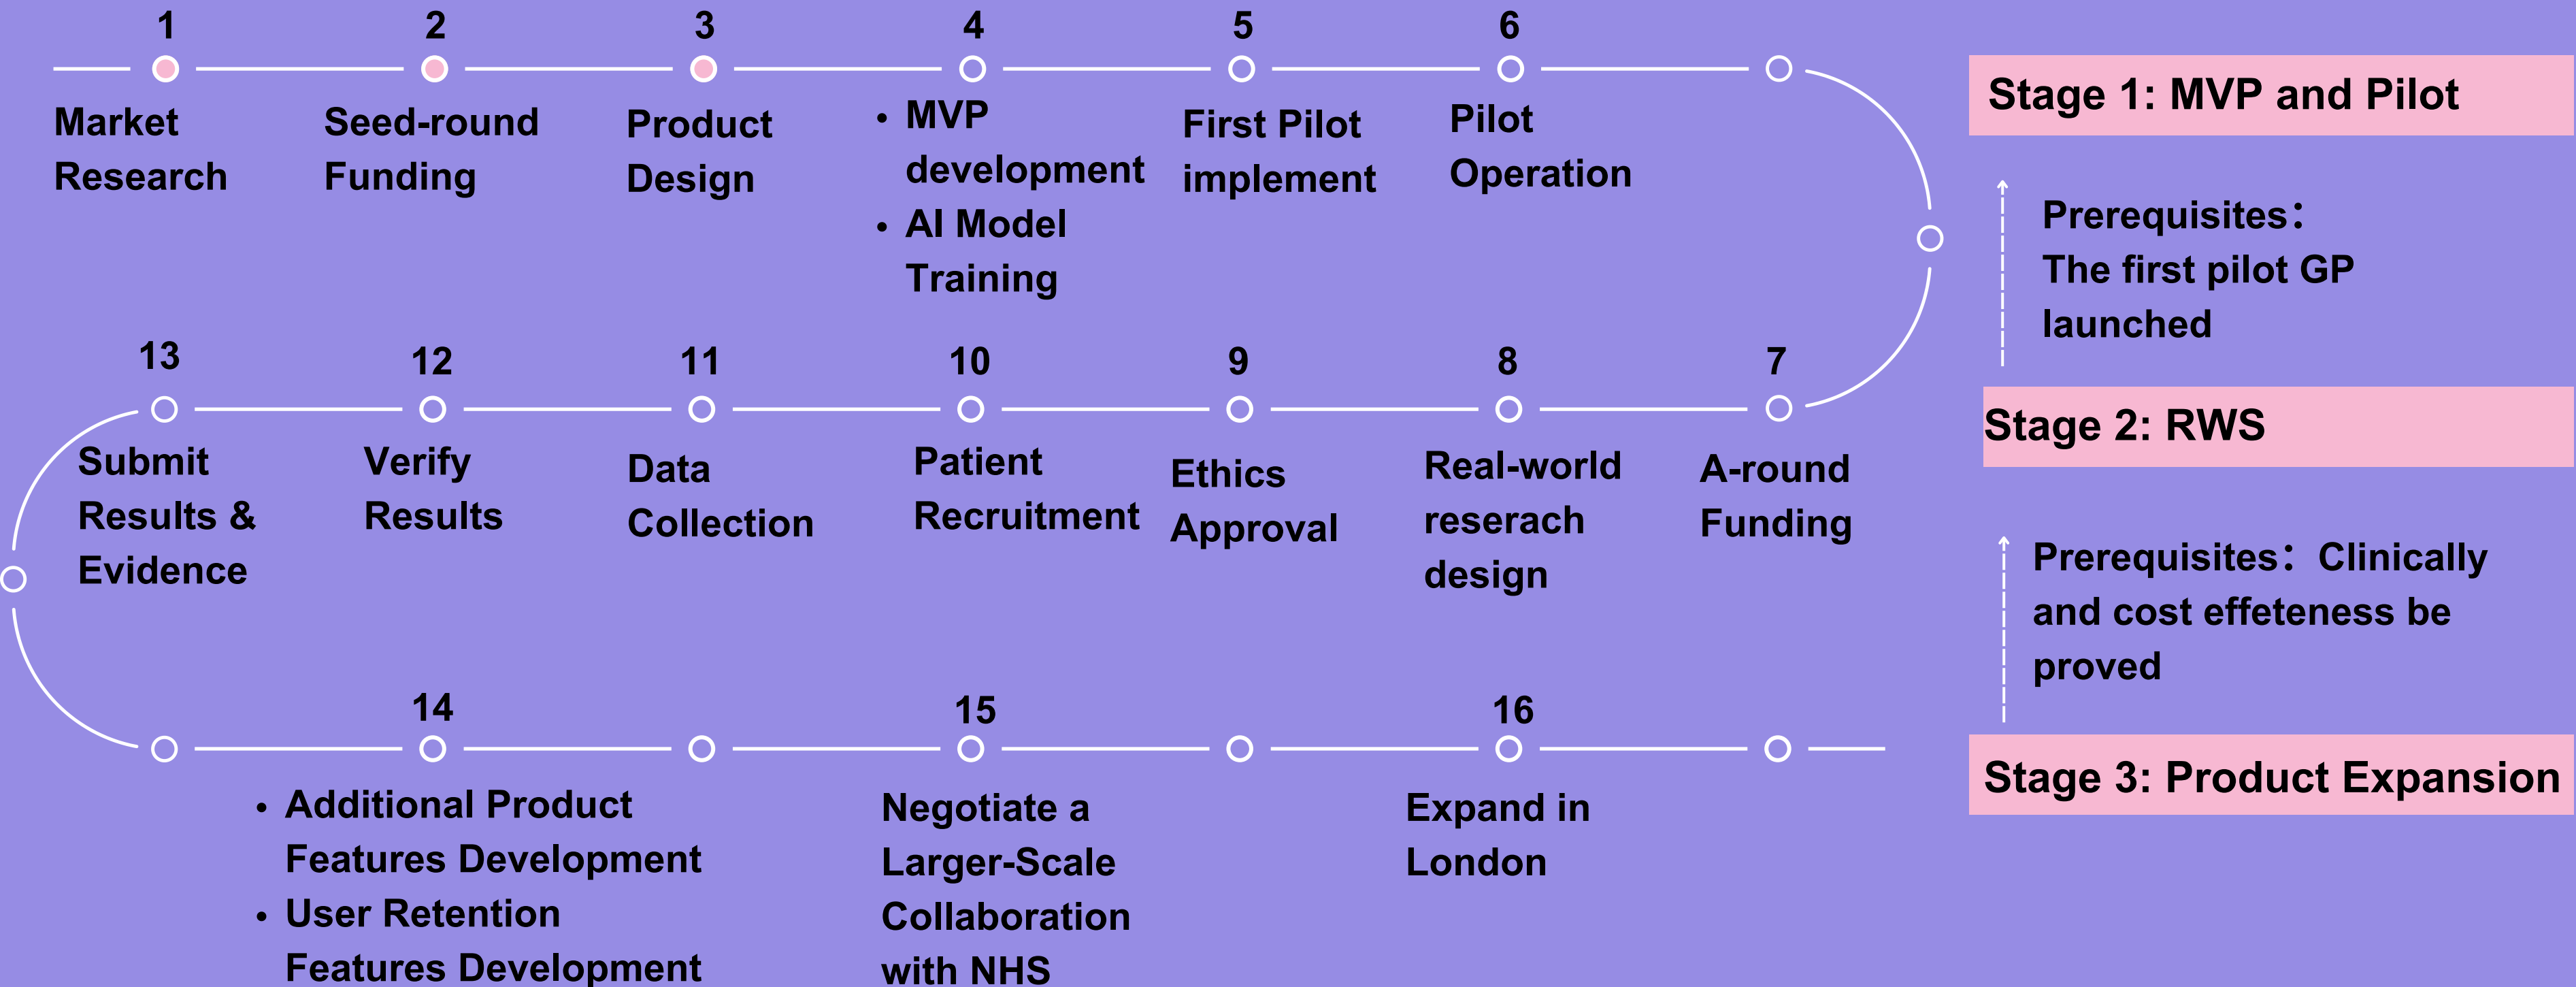

- Collaboration with individual doctors and private hospital
- Direct advertising to customers

Money and Strategy

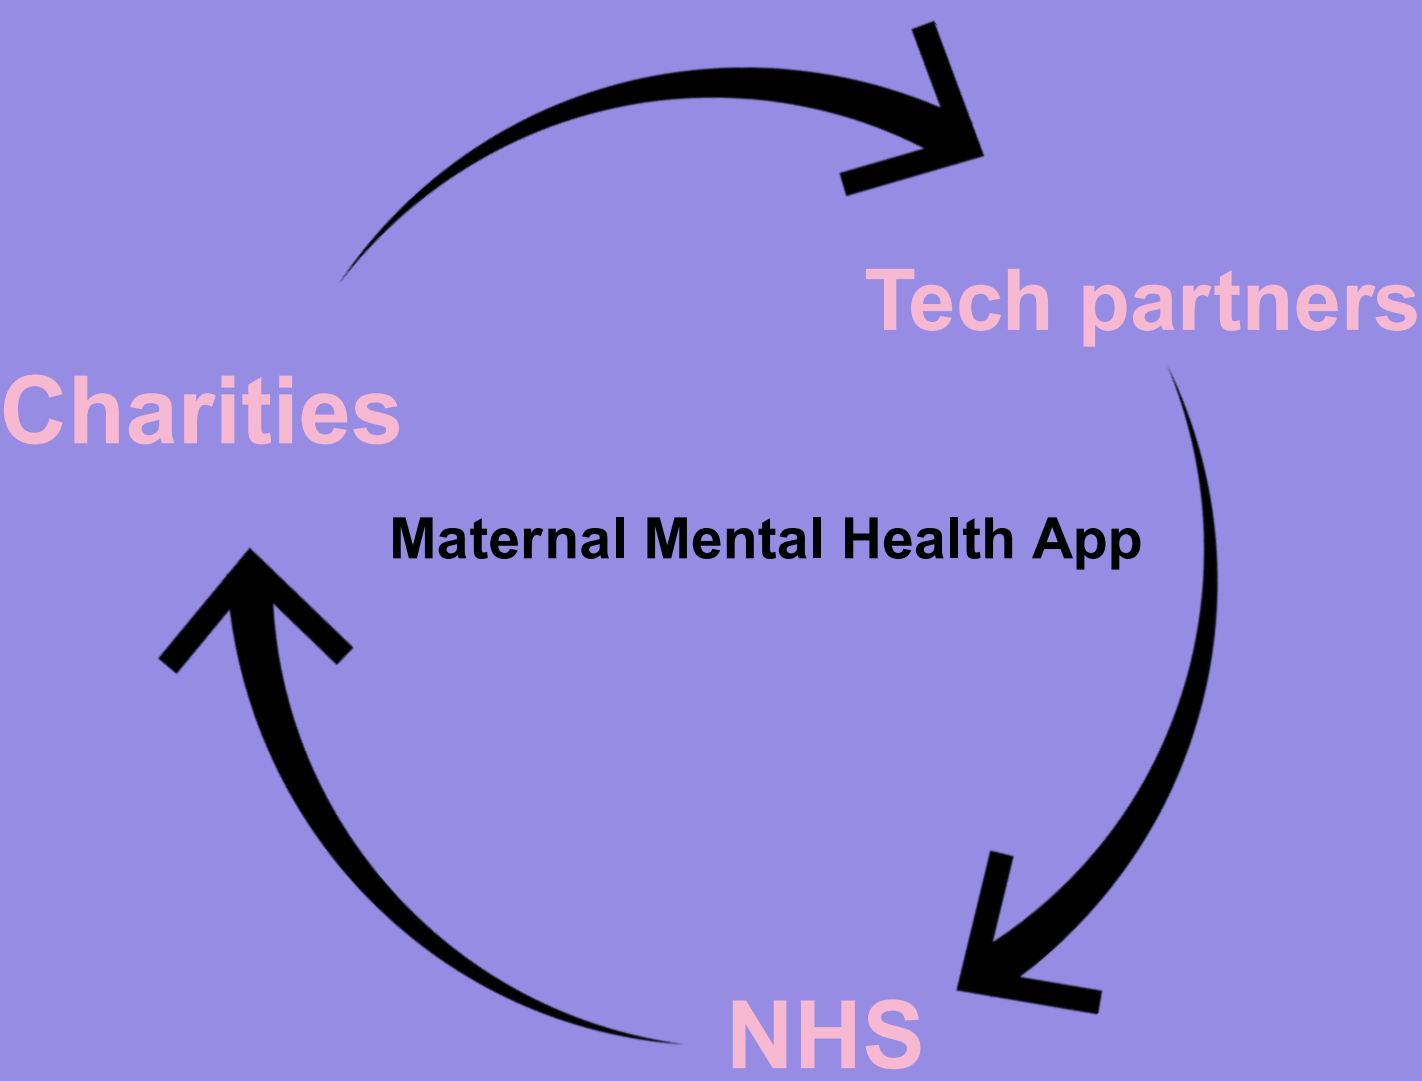

- Allocate budget for doctor partnership
- Spend on advertising
- Fund real world studies

Milestone

Collaboration Ecosystem & Forecasted ROI

· Collaboration & Risk Hedging:

- Revenue diversification: NHS contracts, freemium, corporate
- Pilot in London high-need areas → gradual rollout
- NHS Innovation Hubs + charities (PANDAS, MumsAid) → user adoption

· Forecasted ROI:

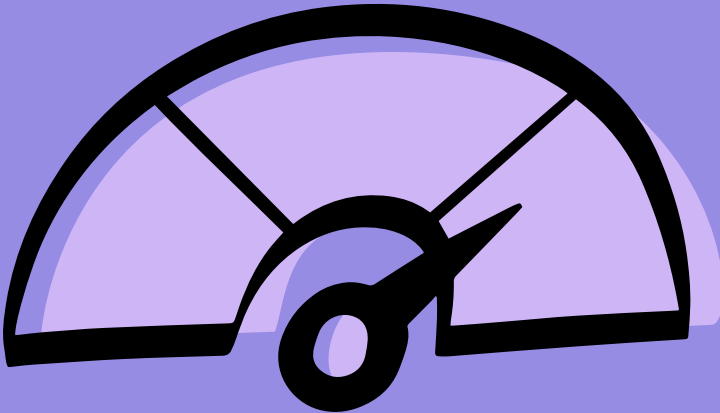

Initial capital: £500k
Break-even: Year 3
NPV (5Y): £1.2m

Optimistic:
15% uptake → £750k revenue

Pessimistic:
5% uptake → £200k revenue

NHS savings potential: £1.2bn/year

“Strong partnerships and diversified revenue ensure sustainability.”

Strategic Risks & Mitigation

Risk	Mitigation Measure
Regulatory (NHS DTAC approval may take 18+ months)	Engage NHS compliance consultants to streamline approval
User Retention (low adoption and engagement among new mothers)	Implement gamification, achievement rewards, and personalized push notifications
Data Security (GDPR violations with fines up to 4% of revenue)	Obtain ISO 27001 certification and conduct annual third party audits
Policy Shifts (potential NHS privatisation or policy changes)	Regularly monitor BMA reports and develop proactive strategies

“Dynamic risk management builds resilience in a shifting healthcare system.”

Future Work & Next Steps

Clinical Validation

- NHS large-scale trials

Product Development

- AI accuracy & emotion recognition

Market Expansion

- Lifestyle partnerships

Partnerships & Collaboration

- NHS & Public Health Agencies

Ethics & Data Privacy

- Machine + Human content review

Thank You
